EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to the applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the applicants' representative Juan Carlos A. Marquez (Reg. No. 34,072) on Sep 12, 2004.

The application has been amended as follows:

Divisional application data added to page 1 by the Aug 5, 2003 Preliminary Amendment:

changed "2002" to--2002, and issued as US Patent 6,639,454 on Oct 28, 2003--;

Claim 2, line 10: added --power-- prior to "supply";

line 11: added --power-- prior to "supply";

Claim 6, line 4: added --power-- after first occurrence of "first";

Claim 11, line 11: added --voltage-- after "supply";

line 13: added --voltage-- after "supply";

line 15: added --voltage-- after "supply";

Claim 13, line 4: added --first-- prior to "power"; and

Claim 15, line 4: added --power-- after first occurrence of "first".

The divisional data was updated to indicate the parent application has now been issued. All of the claim changes address/correct inadvertent oversights by the examiner (e.g. they were not described in the previous Office Action). For example, prior to the above changes: 1) claims 2 and 6 cited a first "supply voltage" while claims 7-9 cited first, second, and/or third "power

supply voltage” or “power supply voltages”; and 2) claim 11 cited a first “power supply”, claim 13 cited “power supply voltage”, claim 15 cited first “supply voltage”, and claims 16-18 cited first, second, and/or “power supply voltage” or “power supply voltages”. Therefore, the changes described above now ensure consistent labeling throughout the claims to minimize possible confusion.

RESPONSE TO TD/AMENDMENT

The terminal disclaimer (TD) and amendment submitted on Aug 23, 2004 were reviewed and considered with the following results:

The terminal disclaimer was approved, and it overcame the double patenting rejections of claims 5 and 14 with respect to U.S. Patent 6,639,454. Therefore, those rejections have been withdrawn.

Since the application data on page 1 has been updated, that objection has now been withdrawn.

The cancellation of claims 1 and 10 rendered their respective objections and rejections moot.

The amended claims overcame all of the claim objections, and their rejections under 35 U.S.C. 112, second paragraph, as described in the previous Office Action. Therefore, the objections to claims 2-9, and 11-18 have been withdrawn, as well as the 35 U.S.C. 112 related rejections of claims 5-9, and 14-18. Although various oversights were noted within the claims when they were carefully reviewed and considered, those were addressed/corrected by the Examiner’s Amendment described above.

Art Unit: 2816

Since amended claims 7 and 16 now depend on claims 2 and 11, respectively, they have overcome their rejections under 35 U.S.C. 102(e) with respect to Ooishi. Therefore, those prior art rejections have now been withdrawn. The reference of Ooishi does not clearly show or disclose a first circuit block with a plurality of registers.

There is now no known objection or rejection remaining within the present application.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

None of the prior art references reviewed and considered shows or discloses the circuit device with first/second circuit blocks, and an interface circuit as recited within independent claims 2 and 11. More specifically, none of the references clearly shows or discloses a first circuit block having a plurality of registers, wherein the first circuit block has specific relationships to the second circuit block, interface circuit, and a power supply voltage as recited within claims 2 (upon which claims 3-9 depend) and 11 (upon which claims 12-18 depend). Since there is no motivation to modify or combine any prior art reference(s) to ensure the first circuit block of the circuit device also includes a plurality of registers as recited, the claims are deemed patentably distinct over the prior art of record.

Claims 2-9, and 11-18 are allowed, and have been renumbered as claims 1-16, respectively. The renumbering takes into account the cancellation of claims 1 and 10.

Any comments considered necessary by the applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
